

EasySave v2.0

Release Note

ProSoft — v2.0 — 2026

1. Overview

EasySave v2.0 is a major release introducing a graphical interface (WPF), unlimited backup jobs, file encryption with CryptoSoft, business software detection, and inherited XML/JSON log format selection from v1.1.

2. What's New

Graphical Interface (WPF)

- Full WPF graphical interface replacing the console
- MVVM architecture — MainViewModel, BackupJobViewModel, SettingsViewModel
- Observer pattern via INotifyPropertyChanged for real-time UI updates
- Settings window — configure log format, business software, encrypted extensions
- Add Job window — browse source and target folders

Unlimited Backup Jobs

- No more limit of 5 backup jobs
- Jobs displayed in a DataGrid with Name, Source, Target, Type

File Encryption with CryptoSoft

- Integration with external CryptoSoft.exe tool
- User defines file extensions to encrypt in Settings
- Encryption time logged in ms (0=no encryption, >0=ms, <0=error)
- Only target files are encrypted after copy

Business Software Detection

- User defines a business software name in Settings (e.g. calc)
- If detected before backup start: backup is blocked
- If detected during backup: current file completes then backup stops
- Stop event logged in daily log file

Log Format (inherited from v1.1)

- JSON or XML format selectable in Settings

3. New Files

File	Description
CryptoSoftService.cs	Calls CryptoSoft.exe via Process.Start()
BusinessSoftwareService.cs	Detects running processes via GetProcessesByName()
MainWindow.xaml	Main WPF window — job list and action buttons
AddJobWindow.xaml	Dialog to create a new backup job

SettingsWindow.xaml	Settings dialog — log format, software, extensions
MainViewModel.cs	Main ViewModel — MVVM + Observer
BackupJobViewModel.cs	Per-job ViewModel — real-time progression
SettingsViewModel.cs	Settings ViewModel — binds Settings to view
RelayCommand.cs	ICommand implementation for MVVM

4. Modified Files

File	Change
LogEntry.cs	Added EncryptionTime: long
BackupJob.cs	Added CryptoSoft + BusinessSoftware checks in loop
BackupManager.cs	Removed _maxJobs = 5 limit
Settings.cs	Added BusinessSoftware and EncryptedExtensions

5. Version Comparison

Feature	v1.1 / v2.0
Interface	v1.1: Console / v2.0: WPF Graphical
Languages	English and French
Backup jobs	v1.1: Max 5 / v2.0: Unlimited
Log format	JSON or XML
Encryption	v1.1: No / v2.0: Yes (CryptoSoft)
Business software detection	v1.1: No / v2.0: Yes
MVVM architecture	v1.1: No / v2.0: Yes
Command line	Yes (both versions)
